

WESTERN LOVE

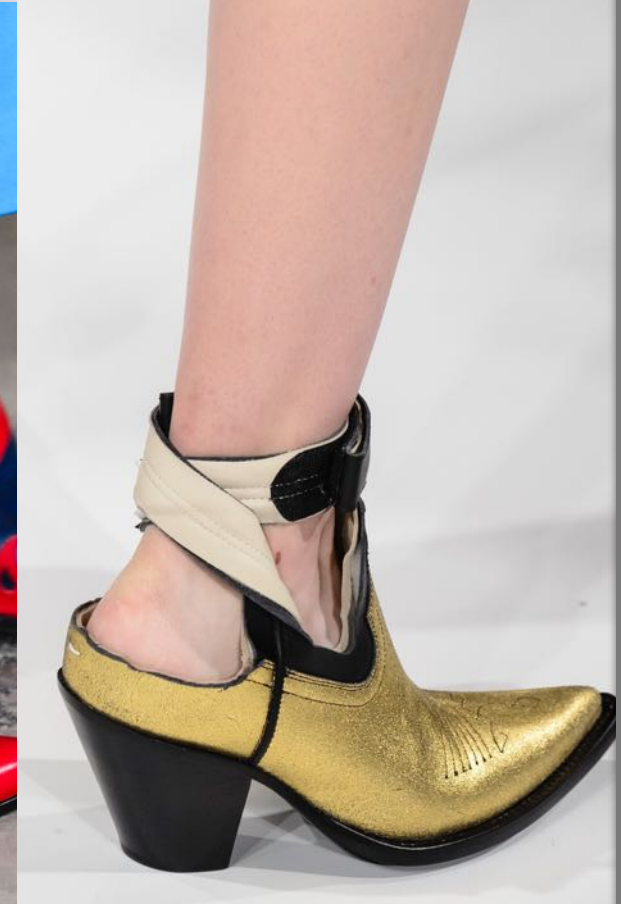

Western inspired accessories are predicted as a big hit for Spring 2019, and this trend picks up on some of the classic elements of the theme, paying homage to the cowboy look. Elaborate western buckles are featured heavily as closures or for decorative effect. Contrast panelling and stitching details are worked into leather handbags and cowboy style boots. Jewellery, belts and other accessories are adorned with natural turquoise stone embellishments in rough, organic shapes. Cowhide is treated as a neutral for accessories, succeeding leopard print. Fringing gets a tough update through the use of metal instead of suede or leather.
