

## ***NEW-NATURALIST***

A desire to delve more into our natural surroundings is a major influence behind this trend. Libraries, collections and museums become comfortable habitats from which we are able to gain a greater knowledge and understanding of the world we live in. This changing attitude towards caring for the environment and reeducating ourselves on how to coexist more kindly is reflective of the current shift in focus to protecting our planet. Shoes and accessories in dark wooden finishes are softened through tactile fabrications and vintage botanicals. The natural elements of materials such as wood and stone are preserved for use in jewellery and trims, giving pieces a whimsy bohemian feel.
